Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 23-28 are rejected under 35 U.S.C. 102(b) as being unpatentable by Kuntman et al (US 6,222,480).

Regarding claim 23, Kuntman discloses an aircraft comprising: an antenna comprising: a functional connector configured for electrical coupling to a functional load comprising an air traffic control transponder and a functional radiating element and plurality of non-functional connectors each configured for coupling to a non-functional load; a base plate configured for coupling the antenna to the aircraft. See figures 10-13, col.20, col.43-67 to col.23, lines 1-35.

Regarding claim 24, Kuntman discloses a plurality of cables (222) for connecting the functional connector of the antenna the functional load and the plurality non-functional connectors to the non-functional load. See figure 10.

Regarding claims 25-26, Kuntman discloses the non-functional load comprising a dummy load and four functional connectors for coupling to at least one of an air traffic control transponder and traffic alert and collision avoidance system and having a base plate configured for coupling the second antenna to the aircraft. See figures 10-13, col.20, col.43-67 to col.23, lines 1-35.

Regarding claim 27, Kuntman discloses wherein the base plate of the first antenna has a size and a shape corresponding to a size and shape of the base plate of the second antenna. See figures 1-10.

Regarding claim 28, wherein the first antenna and the second antenna are L-band antennas. See figure 1-2.

Allowable Subject Matter

3. Claims 10-22, 29-33 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art does not teach that, a first weather detection and avoidance radar system; wherein the first air traffic control transponder and the first traffic alert and collision avoidance system are configured for electrical coupling to a four radiating element antenna', a second cabinet configured for housing: a second air traffic control transponder; a second traffic alert and collision avoidance system', a second terrain awareness and warning system', a second weather detection and avoidance radar system', wherein the second cabinet includes at least the second air traffic control transponder and is configured for electrical coupling to a single radiating element antenna in combination with all limitations recited in independent claims 10 and 17.

The prior art does not teach that, a first cabinet configured for housing: a first air traffic control transponder; a first traffic alert and collision avoidance system; a first terrain awareness and warning system; first weather detection and avoidance

system; a second cabinet configured for housing: a second cabinet configured for housing: a second air traffic alert and collision avoidance system and second terrain awareness and warning system and second weather detection and avoidance radar system recited in independent claim 29.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hudson et al (US 6,545,631) and Johnson et al. (US 6,788,245) are cited to show a surveillance receiver.
